SUBJECT: Phase I Environmental Site Assessment (Revision 1)

Atlanta BeltLine Corridor

Northeast Trail

GDOT PI No.: 0009395

Atlanta, Fulton County, Georgia 30324

Willmer Project No. 74.4302

#### Dear Mr. Peters:

Willmer Engineering Inc. has completed a Phase I Environmental Site Assessment (ESA) for the above-referenced project. The environmental site assessment was accomplished in accordance with our standard procedures that generally follow the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-13, the current GDOT Environmental Site Assessment: Phase I Guidelines that incorporate ASTM 1527-13 by reference, and Willmer Proposal No. 22.P159 dated April 1, 2022 for Heath & Lineback Engineers, Inc.'s (H&L) agreement with Atlanta BeltLine Inc. Notice to Proceed and a Concept Report showing the corridor limits were provided via email from H&L on March 16, 2022.

The original Phase I ESA for this project was submitted on January 22, 2021. This report has been revised to reflect the changes in the proposed trail route provided by H&L dated March 16, 2022.

This report presents the results of our review of the public record, field reconnaissance, and interviews with knowledgeable individuals to date. If you have any questions, please contact Keith Kaylor, PE at (770) 286-7477.

Sincerely,

WILLMER ENGINEERING INC.

Keith A. Kaylor, PE

Senior Environmental Engineer

Phase I Environmental Site Assessment (Rev. 1)
Atlanta BeltLine Corridor, Northeast Trail
GDOT PI No.: 0009395
Atlanta, Fulton County, Georgia 30324

Willmer Project No. 74.4302 Page 1

# 1.0 Executive Summary

Willmer was retained by H&L on behalf of ABI and partially funded by GDOT to conduct a Phase I ESA for the proposed Northeast Trail section of the Atlanta BeltLine (hereinafter known as the "corridor") in Atlanta, Fulton County, Georgia. As described by the website for the BeltLine (www.beltline.org):

"The Atlanta BeltLine is the most comprehensive transportation and economic development effort ever undertaken in the City of Atlanta and among the largest, most wide-ranging urban redevelopment programs currently underway in the United States. It is a sustainable redevelopment project that will ultimately connect 45 intown neighborhoods via a 22-mile loop of multi-use trails, modern streetcar, and parks – all based on railroad corridors that formerly encircled Atlanta. When completed, it will provide first and last mile connectivity for regional transportation initiatives and put Atlanta on a path to 21st century economic growth and sustainability."

The BeltLine is being constructed in sections. The Northeast Trail connects the existing Eastside BeltLine Trail to the PATH400 trail at the MARTA Lindbergh Station plaza. The Northeast Trail is approximately 2.8 miles in length, including the side branches. It is noted that during construction, the Northeast Trail may be constructed in individual segments due to funding limitations; however, for purposes of this report, we are considering the entire corridor, as the construction staging is not expected to change our evaluation. The corridor limits and proposed work are shown on a figure provided by H&L included in Appendix I.

The project is in Atlanta, Fulton County, Georgia within zip code 30324 near the Armour Yards and Lindbergh areas of Atlanta. The corridor location is shown in Figure 1 and the corridor alignment is shown in Figure 2. The final alignment depends on further study by ABI and negotiations with Norfolk Southern railroad. The corridor begins north of the north end of the existing Eastside BeltLine Trail, which currently ends east of the Ansley Golf Club and immediately south of Interstate 85. The majority of the trail is located within the Armour Yards district and connects with the existing PATH400 trail, as shown on Figure 2.

The area adjacent and surrounding the corridor is developed with multifamily complexes, single family residences, and commercial and industrial properties in the Armour Yards business district and near the Lindbergh MARTA station. The remaining acreage surrounding the corridor consists of undeveloped and/or wooded properties.

This Phase I ESA was conducted to identify, classify and tabulate potential environmentally impacted properties by field reconnaissance and a review of various facilities listed in state and federal databases located within the boundaries of the proposed corridor. No boundary survey was available at the time of preparation of this report. H&L provided a figure to Willmer prepared by H&L which defined the boundaries of the corridor (Appendix I). Willmer based the limits of the Phase I ESA investigation on this information.

The Phase I ESA was accomplished in accordance with our standard procedures that generally follow the *ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-13*. Additionally, since a segment of the corridor is funded by GDOT, the current *GDOT Environmental Site Assessment: Phase I Guidelines* that incorporate *ASTM E1527-13* by reference were also generally followed. Our work was guided as well by Willmer Proposal No. 22.P159 dated April 1, 2022 for Heath & Lineback Engineers, Inc.'s agreement with Atlanta BeltLine Inc.

The original Phase I ESA for this project was submitted on January 22, 2021. This report has been revised to reflect the changes in the proposed trail route provided by H&L dated March 16, 2022. These changes consisted of:

• Rerouting the southern connection to the Eastside Trail from the western end of Ottley Drive to its eastern end;

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 2

- A slight change to the route on the west side of the Ready Mix Concrete Plant; and
- Addition of a short connector to Kinsey Court.

Suspect properties identified from public data sources, interviews and field reconnaissance are presented in Table 1. No mailings or door-door surveys were conducted.

#### 1.1 Findings

This Phase I ESA conducted detailed evaluations of the six properties listed below, as potential REC facilities located within the proposed limits of the Northeast Trail corridor. Four of the properties were determined to have RECs.

## **Properties Identified for Further Environmental Investigation**

EDR Map ID No. <sup>1</sup>	Property Description	Address	EDR Databases <sup>2</sup>	Further Investigation Required	Report Discussion Section No.
C8,C9, 13	Ready Mix USA, Inc. / Armour Drive Concrete	340 - 342 Armour Drive NE	UST, SHWS, GA VCP, LUST, UST, RCRA NonGen, EDR Hist Cleaner	Yes	9.1
A1, A2	Specialty Construction/ Home Depot	171 Armour Drive NE	RCRA NonGen, LUST, UST	Yes	9.2
В3	Southern Signatures	201 Armour Drive NE	RCRA NonGen, ECHO	No	9.3
В6	Atlantel	199B Armour Drive NE	RCRA NonGen	Yes	9.4
17	Crown Cork and Seal	125 Ottley Drive NE	GA Non-HSI, UST, SPILLS, RCRA NonGen	Yes	9.5
4	NW 251 Armour, LLC	251 Armour Drive	RCRA-SQG	No	9.6
Notes:					

#### Notes:

<sup>2</sup> UST – Underground Storage Tank; SHWS – State Hazardous Waste Sites; LUST – Leaking Underground Storage Tank; GA Non-HSI – Georgia Non-Hazardous Site Inventory; GA VCP – Georgia Voluntary Cleanup Program; ECHO – Enforcement and Compliance History Online; RCRA – Resource Conservation and Recovery Act (Hazardous Waste generators)

No "full take" property acquisition is anticipated by this corridor work. However, other potential onsite environmental issues may include the presence of PCB-containing transformers, ACM, LBP, and inactive wells and/or septic systems which may require proper abandonment and closure. These concerns may require additional assessment if affected by the proposed project to adhere to applicable Federal, State and/or local regulations protective of the general public health, safety and welfare during construction activities.

#### 1.2 Opinions

The database review, field reconnaissance, interviews and adherence to GDOT Policy 5525-1 directed the selection of the properties identified in Table 1 for Phase II investigation (see Figure 2). The Phase II investigation will be in conformance with the scope and limitations of ASTM Practice E1903-19 for Phase II Investigations and GDOT's *Environmental Site Assessment: Phase II Guidelines*, to determine what, if any, environmental impacts exist to soil and/or groundwater (if encountered). This investigation should be completed prior to right-of-way acquisition and construction.

#### 1.3 Conclusions

We have performed a Phase I Environmental Assessment in conformance within the scope and limitations of ASTM

<sup>&</sup>lt;sup>1</sup> See Table 1

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 3

Practice E1527-13 and GDOT Policy 5525-1 of the proposed Northeast Trail corridor. Any deviations from or exceptions to this practice are described in Sections 2.5 and 2.6 of this report. This assessment has revealed no evidence of REC in connection with the corridor except for the following:

- A Phase II subsurface investigation should be conducted at the potential REC properties listed in Table 1 to determine if they are environmentally impacted by hazardous substances and/or petroleum products. The Phase II investigation should be performed within rights-of-way and/or easements to be acquired, prior to initiation of construction activities. The Phase II investigation should follow the ASTM Practice E1903-19 guidelines. For the portions of the work subject to GDOT guidelines, GDOT's Environmental Site Assessment: Phase II Guidelines should also be followed.
- Although non-scope issues such as ACM and LBP are not part of a Phase I ESA, if any structures are
  determined to require demolition or renovation as part of the corridor, a comprehensive survey should
  be conducted of these structures by Georgia certified inspectors to determine the presence of ACM and
  LBP prior to construction activities within the corridor. ACM and LBP material removal and disposal must
  be conducted by a certified abatement contractor in accordance with applicable Federal, State, and local
  regulations.
- The electrical utility provider, Georgia Power, should be contacted regarding the potential for PCBcontaining fluids within the electrical transformers installed before 1980 prior to their removal or relocation.
- Upon discovery of any subsurface features (*i.e.*, wells, USTs, and/or septic systems) at any property whether identified as a property with a recognized environmental condition or not, these subsurface features should be closed and/or removed in accordance with Federal, State, and local regulations, if applicable.

Page 4

#### 2.0 Introduction

## 2.1 Purpose and Scope of Services

The purpose of this Phase I ESA is to identify recognized environmental conditions in connection with the proposed project prior to construction by means of review of the public record information, field reconnaissance and interviews. The Phase I ESA was accomplished in accordance with our standard procedures that generally follow the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-13. Additionally, since a segment of the corridor is funded by GDOT, the current GDOT Environmental Site Assessment: Phase I Guidelines that incorporate ASTM E1527-13 by reference were also generally followed. Our work was guided as well by Willmer Proposal No. 22.P159 dated April 1, 2022 for Heath & Lineback Engineers, Inc.'s agreement with Atlanta BeltLine Inc. Notice to Proceed and a Concept Report showing the corridor limits were provided via email from H&L on March 16, 2022.

Willmer's approach to performing the assessment consists of three primary tasks.

- The first task involves reviewing readily available public records for evidence of past or present activities on the properties located within the limits of the project corridor that may have resulted in the contamination of the properties by deposition of hazardous substances or petroleum products. Willmer subcontracted with Environmental Data Resources Inc. (EDR) to provide a database summary of public information including historical development, land use and past activities within a 1.0-mile distance on either side of the project, including historical topographic maps, historical aerials, historical city directories, and Sanborn Maps.
- The second task consists of field reconnaissance of the properties and contiguous properties for visual indication of past or current impacts of hazardous substances/wastes or petroleum products on or immediately contiguous to the proposed corridor. These environmental concerns and others identified in the public record (as described in Task 1 above) were included in Willmer's follow-up visits to document conditions of potential environmental conditions located within the corridor limits.
- The third task consists of conducting interviews with persons knowledgeable about the properties and vicinity. Willmer also contacted the City of Atlanta government for information related to environmental issues at properties located within the limits of the corridor.

Other evaluations, including sampling and testing for hazardous materials, petroleum hydrocarbons, radon, lead-based paint and asbestos, and determination and delineation of wetlands, were not within the scope of this environmental assessment. Only limited reviews of published wetlands information (Section 3.7) and vapor migration (Section 3.8) were performed.

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 5

#### 2.2 Definitions

ASTM E1527-13 uses the following definitions to mean:

- Recognized Environmental Condition (REC) the presence of likely presence of any hazardous substances
  or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions
  indicative of a release to the environment; or (3) under conditions that pose a material threat of a future
  release to the environment.
- Controlled recognized environmental condition (CREC) a recognized environmental condition resulting
  from a past release of hazardous substances or petroleum products that has been addressed to the
  satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no
  further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with
  hazardous substances or petroleum products allowed to remain in place subject to the implementation
  of required controls (for example, property use restrictions, activity and use limitations, institutional
  controls, or engineering controls).
- Historical Recognized Environmental Condition (HREC) a past release of any hazardous substance or
  petroleum products that has occurred in connection with the property and has been addressed to the
  satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a
  regulatory authority, without subjecting the property to any required controls (for example, property use
  restrictions, activity and use limitations, institutional controls, or engineering controls).
- De minimis condition a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

These definitions were used to determine the impacts of information reviewed in the public record, observed from field reconnaissance and interviews with knowledgeable individuals.

#### 2.3 Special Terms and Conditions

This assessment was performed in accordance with the agreed upon terms and conditions as specified in Willmer Proposal No. 22.P159 dated April 1, 2022 for Heath & Lineback Engineers, Inc.'s agreement with Atlanta BeltLine Inc. The project Notice to Proceed and a figure outlining the corridor limits were provided to Willmer via email from H&L on March 16, 2022.

#### 2.4 User Reliance and Limiting Conditions

No environmental assessment can preclude the presence of hazardous substances or petroleum products on the property. The findings, opinions, and conclusions provided in this report will assist Atlanta BeltLine, Inc and Heath & Lineback Engineers, Inc. in evaluating and allocating the environmental risks that are present with the limits of the project as provided by H&L. Willmer has made a diligent attempt to reveal potential environmental concerns. Our research is limited to the available public records, review of client-provided documents, and acceptance of information from interviews with those contacted and available, and observations made during our field reconnaissance. Generally, the information obtained from the public records and interviews concerning the property are presumed reliable. However, Willmer cannot warrant or guarantee that the information provided is complete or accurate.

This report is provided for the exclusive use of ABI, H&L, and their designated subconsultants and is not to be used or relied upon in connection with other projects or by additional parties unless prior approval is obtained from

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 6

Willmer. Any such approval by Willmer for additional parties to rely on this report will be subject to the terms and conditions under which the work was conducted. The unauthorized use of this report by any other parties will be at their sole risk.

The information provided to Willmer by its subcontractor, EDR, included historical USGS topographic maps dating between 1888 and 2014. Willmer reviewed the USGS website (Reference 4) and downloaded the most recent USGS topographic map dated 2020.

The information contained in the report provided to Willmer by its subcontractor, EDR, is obtained from publicly available data sources and other secondary sources of information provided by entities other than EDR. Willmer does not control the content or quality of work provided by subcontractors and vendors and is therefore not responsible for errors, omissions, or inaccuracies in their furnished information.

#### 2.5 Deviations

No significant deviations or deletions from ASTM E1527-13 were noted during preparation of this assessment likely to affect our professional opinion.

#### 2.6 Exceptions

Available published historical sources reviewed for this assessment provided information sufficient to determine the uses of the properties within the limits of the project from the present, back to the property's first developed use, or back to 1940, whichever is earlier.

No significant exceptions which are likely to influence our professional opinion were noted during this assessment.

#### 2.7 Significant Assumptions

As noted in Section 1.0, no boundary survey was available for this project. H&L provided a figure which was used to define the boundaries and limits of the project. Willmer based the limits of the Phase I ESA investigation on the information contained in the Concept Report.

No other significant assumptions, which are likely to influence our ability to identify REC properties in connection with the project limits, were made in preparation of this assessment.

#### 2.8 Data Gaps

ASTM E1527-13 does not impose on the environmental professional the responsibility to undertake a review of recorded land title records and judicial records for environmental liens and AULs. No review of these records was performed by Willmer during preparation of the Phase I ESA (Section 4.4).

One data gap of note is that only limited interviews with current owners/occupants of properties considered to have potential recognized environmental conditions could be conducted during field reconnaissance or afterwards via telephone. This gap is due to the commercial property representatives being unwilling or unable to provide information. The interviews that were conducted are described in Section 8.0.

Based on the available historic property information, these data gaps do not affect our professional opinion.

Phase I Environmental Site Assessment (Rev. 1)

Willmer Project No. 74.4302

Page 7

# 3.0 Property Setting

Understanding of the physical setting of a property is important to the recognition of environmental impacts to the property. A consideration of surface topography and geology are of interest since they provide an indication of the direction that contaminants, if present onsite or offsite, could be transported. The term "upgradient" refers to a location at a higher elevation and "downgradient" refers to a location at a lower elevation. The term "cross-gradient" describes locations that are considered to be at equal elevations and or separated by a drainage feature; as such, contaminants are unlikely to be transported from one location to the other by surface or subsurface drainage. Topographic maps, internet sources and published data were researched, and the information obtained is summarized in the following discussions.

#### 3.1 Location and Description

The Northeast Trail corridor connects the existing Eastside BeltLine Trail to the PATH400 trail at the MARTA Lindbergh Station plaza. The corridor is approximately 2.8 miles in total length, including the side branches. The corridor is in Atlanta, Fulton County, Georgia, within zip code 30324, and near the Armour Yards and Lindbergh areas of Atlanta. The corridor limits are shown in the Concept Report provided by H&L and included in Appendix I. The corridor location is shown in Figure 1 and the corridor alignment is shown in Figure 2.

The original Phase I ESA for this project was submitted on January 22, 2021. This report has been revised to reflect the changes in the proposed trail route provided by H&L dated March 16, 2022. These changes consisted of:

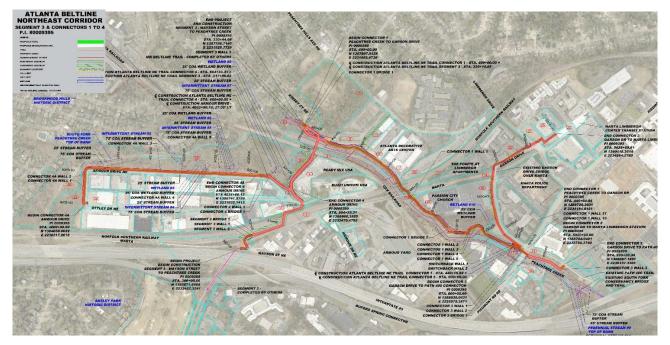

- Rerouting the southern connection to the Eastside Trail from the western end of Ottley Drive to its eastern end;
- A slight change to the route on the west side of the Ready Mix Concrete Plant; and
- Addition of a short connector to Kinsey Court.

The corridor begins north of the north end of the existing Eastside BeltLine Trail, which currently ends immediately east of the Ansley Golf Club and south of Interstate 85, and continues through the Armour Yards district to the south end of the PATH400 trail, as shown in the below map.

Phase I Environmental Site Assessment (Rev. 1)
Atlanta BeltLine Corridor, Northeast Trail
GDOT PI No.: 0009395
Atlanta, Fulton County, Georgia 30324

Willmer Project No. 74.4302 Page 8

The area adjacent and surrounding the corridor is developed with multifamily complexes, single family residences, and commercial and industrial properties in the Armour Yards business district and near the Lindbergh MARTA station. The remaining acreage surrounding the corridor consists of undeveloped and/or wooded properties.

#### 3.2 Topographical and Historical Setting

The topographic map for the corridor is comprised of the following historical USGS Topographic Quadrangle Maps (Reference 1):

- 1888 and 1895 Atlanta
- 1927 Atlanta Vicinity, Sheets 52, 53, 58, and 59
- 1954 Bolton
- 1968, 1973, 1983, 1995, 1999, 2014 and 2020 Northeast Atlanta and Northwest Atlanta

These maps were reviewed for physical setting and historical information and are presented in the EDR Historical Topo Map Report with Quad Match™ (Appendix IV). Historical aerial photography provided by EDR, dated 1938, 1949, 1955, 1960, 1968, 1972, 1978, 1981, 1999, 2007, 2013, and 2019 (Reference 2) and internet sources (Reference 3) were also reviewed as a part of this study. The most recent USGS topographic maps for Northwest Atlanta and Northeast Atlanta are dated 2020 and were downloaded from the USGS website (Reference 4), and is presented as Figure 3.

Internet sources reviewed for historical aerial photography and historical topographical maps indicate the topography southeast to northwest along the project starts at an approximate elevation of 870± NGVD near the southeastern end of the corridor adjacent to Interstate 85, and 840± NGVD at its southwestern end at Ottley Drive. Heading northeast and north along the corridor, the ground elevation gradually decreases to an approximate elevation of 790± NGVD near Peachtree Creek. Continuing northeast, the ground elevation gradually increases to an approximate elevation of 850± NGVD at the intersection of Garson Drive and Piedmont Road. The ground elevation sharply increases to an approximate elevation of 870± NGVD along the west side of Garson Drive near the northwestern end of the corridor at the Lindbergh MARTA station. On the south side of Garson Drive and

Atlanta, Fulton County, Georgia 30324
Willmer Project No. 74.4302

Page 9

Adina Drive, the ground elevation gradually increases to an approximate elevation of 830± NGVD at the northeast end of the project where it connects with the PATH400 trail.

#### 3.3 Surface Water Runoff Characteristics

Surface water runoff generated on the properties adjacent to the corridor generally flows via sheet flow to grass ditches or culverts, is intercepted by storm sewer systems via curb and gutter and inlet features, or flows directly into Peachtree Creek. The direction of surface water runoff is largely dependent on the existing surface topography as illustrated on Figure 3.

- Southeast end of corridor north to the railroad south of Armour Yards: Surface water from properties located adjacent to the corridor in this area appears to sheet flow to storm sewer systems via inlet features.
- Armour Yards business district: Surface water from properties located adjacent to the corridor in the Armour Yards business district flows to storm sewer systems via curb and gutter and inlet features, which appear to be directed to Peachtree Creek.
- North of Armour Drive, passing over Peachtree Creek and continuing east adjacent to Peachtree Creek:
   Surface water from properties located adjacent to the corridor in this area flows via sheet flow directly to Peachtree Creek.
- Garson Drive: Surface water from properties located adjacent to the corridor along Garson Drive flows to storm sewer systems via curb and gutter and inlet features, which appear to be directed to Peachtree Creek.

Peachtree Creek appears to flow to the west beyond the project limits.

#### 3.4 Geologic Setting

The Geologic Map of Georgia (Reference 7) depicts the majority of the corridor as underlain by the Biotitic Gneiss Undifferentiated (GAfg2;3), with the northern portion of the corridor near the Lindbergh MARTA station underlain by Porphyritic granite (GAgr1b;3). Geologic mapping of the property, as described in the Geology of the Greater Atlanta Region, indicates the property lies south of the Brevard fault zone within the Atlanta Group of the Southern Piedmont Geologic Province (Reference 8).

Bedrock of the Southern Piedmont Geologic Province is similar to bedrock north of the Brevard fault zone and composed of metamorphic rocks with localized igneous intrusions. Residual soils or saprolite encountered above the bedrock within the Southern Piedmont are a product of in-situ chemical and physical weathering of the parent rock. Weathering is most advanced near the surface and decreases with depth. The near surface soils are often clayey, grading to sandy silts or silty sands with increasing depth. In deeper residual soil strata, the banded structural appearance of the parent rock is evident. Partially weathered rock is usually encountered below the saprolite and is a transition zone to the underlying, relatively sound, continuous rock.

An important aspect of the Southern Piedmont subsurface profile is that the depth to rock is highly variable and can vary greatly over short horizontal distances. Also, zones of partially weathered rock may be encountered within residual soil, and zones of soil may be found within the rock mass. This profile may be altered by man, by excavation or filling, and may be altered by erosion or deposition of alluvial soils

#### 3.5 Soil Survey

According to the Web Soil Survey (Reference 13), the project lies in a zone composed of Urban land (74.4% of

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 10

area), Congaree Sandy Loam (7.0% of area), Udorthents (6.5% of area), Wickham sandy loam (0.4% of area), and Water (11.6% of area). The soil survey generally describes the top 5 feet of the soil.

#### 3.6 Groundwater Studies and Wells

According to the *Most Significant Ground Water Recharge Areas of Georgia, Hydrologic Atlas 18* (Reference 6), the project is in the Piedmont geologic province. Probable areas of thick soils, indicative of significant groundwater recharge areas, are not mapped in the vicinity of the project. A review of the *Ground Water Pollution Susceptibility Map of Georgia*, Hydrologic Atlas 20 (Reference 9) indicates that the project is located within a lower susceptibility area (drastic rating <141) and is not located in a most significant groundwater recharge area of Georgia. This map was developed from the U.S. EPA system for evaluating groundwater pollution potential using hydrogeologic settings.

The EDR Well Search Report is based on EDR's review of water well information provided to the US EPA, USGS, Georgia DNR, and the Georgia Department of Community Affairs. The EDR Well Search Report, which was prepared for the original Phase I ESA in January 2021, identified one well located within one mile of the project. This well was identified at a BP Gas Station at the corner of Lavista Road and Cheshire Bridge Road, approximately 0.75 mile east of the eastern end of the corridor. One groundwater measurement dated 7/5/1995 was reported by EDR, at 14.85 ft below ground surface. No other information on this well was reported by EDR. The information provided by EDR is included in the EDR Well Search Report located in Appendix III. A review of the well information listed in *Groundwater in The Greater Atlanta Region* (reference 5) confirmed the presence of this well as the only well listed within one mile of the corridor.

#### 3.7 Wetlands

Wetlands determination and delineation are not a part of this study. Our review of the online *National Wetlands Inventory Map* database (Reference 12) maintained by the US Fish and Wildlife Service indicates that Peachtree Creek is identified as a "Riverine" feature within the project limits. No other wetland features are located within or adjacent to the project limits.

#### 3.8 Vapor Migration

Migration refers to the movement of hazardous substances or petroleum products in any form, including solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration is not part of a Phase I ESA. Hazardous substances and/or petroleum products were identified at properties adjacent to the project where right-of-way or easements are planned to be acquired. However, since no building structure is planned for construction within the corridor limits, a vapor intrusion study is not a consideration.

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 11

# 4.0 Property History

Available published historical sources reviewed for this assessment provided information sufficient to determine all uses of the properties adjacent to the project from the present, back to the first developed use of the properties adjacent to or surrounding the project, or back to 1940, whichever is earlier. Appendices IV, V, VI, and VII as well as other referenced sources, illustrate the following narrative.

#### 4.1 Historical Aerial Photography and Topographic Maps

Historical aerial photography provided by EDR (Appendix V) and others as referenced was reviewed to ascertain the impact of development within the project limits and surrounding area. The earliest EDR aerial photography reviewed was dated 1938 with additional photographs dated 1949, 1955, 1960, 1968, 1972, 1978, 1981, 1999, 2007, 2013, and 2019. Additional periodical historical aerial photography from Google Earth dated 1993, 1999, and 2002 to 2020 was also reviewed.

EDR provided historical USGS topographic maps dated 1888, 1895, 1927, 1954, 1968, 1973, 1983, 1995, 1999, and 2014. Additional USGS topographic maps for Northeast Atlanta and Northwest Atlanta dated 2020 were downloaded from the USGS website and combined. Section 3.2 describes the topographic maps in greater detail.

The referenced topographical sources appear to indicate that the railroads and Piedmont Avenue were constructed prior to 1888. However, the area within the project limits was otherwise undeveloped, with no roadways or buildings noted on the topographic maps. Between 1895 and 1927, the topographic maps appear to indicate that several large buildings were constructed at the location of the current Ready Mix concrete plant. The 1938 aerial photograph indicates the presence of three large buildings at the location of the current Ready Mix concrete plant and the area to the east, as well as a series of small buildings south of the railroad lines (possibly residences or outbuildings for the larger complex, along what is currently Mason Street). With the exception of these structures and the aforementioned railroads and Piedmont Avenue roadway, no other development is noted within or adjacent to the corridor limits in the 1938 aerial photograph. Between 1938 and 1949, the only changes to properties adjacent to the corridor appear to be the construction of a residential housing area adjacent to Piedmont Avenue, at the location of the current AMLI apartment complex. No changes are noted between 1938 and 1949.

By 1956, the area of the current Armour Yards business district site appears to have been cleared, Armour Drive, Ottley Drive, and Clayton Road appear to have been constructed, and two buildings are present within the limits of the district. Interstate 85 was also constructed during this period, and the third large building east of the current Ready Mix concrete plant has been demolished. Near the northeast end of the corridor, a number of buildings were constructed along the present-day location of Garson Road.

Between 1960 and 1993, the entire project area continued to develop with additional commercial and industrial properties. The Mason Street area changed from residential development to the current commercial buildings between 1960 and 1966. Between 1993 and 1999, the current alignment of Garson Road was constructed. No further changes to the alignment of the roadways or railroads are noted between 1999 and present day. Aside from the construction of roadways and structures mentioned above, no major changes to the topography along the project limits are noted in the review of topographic maps between 1888 and present day. The aerial photographs between 1938 and the most recent 2019 Google Earth aerial photograph indicate the development of the corridor with additional single-family residences, multifamily complexes, commercial and industrial properties, as described above.

Property specific information obtained from review of the aerial photography and topographic maps, if any, is

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 12

discussed in "onsite properties of environmental concern", which are defined as properties within the project limits (Section 9.0), and "offsite properties of environmental concern" which are defined properties not currently within the project limits (Section 10.0).

#### 4.2 Historical Sanborn Fire Insurance Maps

Willmer requested Historical Sanborn Maps from EDR (Appendix VI). The Sanborn Library is a collection of historic fire insurance maps. EDR searched their database of Sanborn Maps and no maps covering the project area were reported.

#### 4.3 Historical City Directories

Willmer requested Historical City Directories from EDR (Appendix VII). The earliest City directory reviewed was dated 1957, with additional directories dated 1961, 1965, 1971, 1976, 1981, 1986, 1991, 1994, 1999, and 2005. The city directories appear to list properties along the project as primarily commercial or industrial from the earliest 1957 city directory to the most recent one reported in 2005.

#### 4.4 Title Records

ASTM E1527-13 does not impose on the environmental professional the responsibility to undertake a review of recorded land title records and judicial records for environmental liens and AULs. No chain of title was requested by Willmer or provided by H&L or ABI. No chain of title review was performed during preparation of the Phase I ESA.

#### 4.5 Environmental Liens or Activity and Use Limitations (AULs)

As described in the User Provided Information reported in Section 5.1, the user has no knowledge of environmental liens or AULs against properties within the project limits filed or recorded in a registry under federal, tribal, state, or local law.

EDR reports the results from select federal and state databases pertaining to environmental liens and AULs including facilities with engineering or institutional controls in place, local land records to determine if properties within the proposed project limits have had EPA Superfund monies spent to investigate releases or threatened releases, and tribal listings. These databases do not provide as comprehensive a summary of all information required by the ASTM guidelines. EDR identified one property on the Georgia Institutional Controls list, the Cornerstone Medical Facility located approximately 0.42 miles west of the corridor at 1875-1901 Peachtree Road, as described in Section 6.0. No other evidence of environmental liens was noted in the EDR sources reviewed for this assessment.

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 13

#### 5.0 User Provided Information

Willmer provided the User Questionnaire to Patrick Peters, PE of H&L. Mr. Peters completed the User Questionnaire and Willmer summarized the responses as shown below. The completed questionnaire is presented in Appendix VIII.

#### 5.1 Environmental Liens or Activity and Use Limitations (AULs)

A comprehensive environmental lien search on each property of recognized environmental concern was not conducted by the user and was not a part of the Phase I ESA work conducted by Willmer for the project.

The user reported no knowledge of environmental cleanup liens against properties within the project limits filed or recorded under federal, tribal, state or local law.

As noted in Section 6.0, the EDR databases reviewed for this assessment reported one facility with institutional controls or AULs. No properties were reported by EDR on the Liens 2 Federal CERCLA database, as noted in Section 6.0.

#### 5.2 Specialized Knowledge

No specialized knowledge or experience related to the properties or adjoining properties within the project limits was noted by the user.

#### 5.3 Valuation Reduction for Environmental Reasons

The user reported no knowledge or opinion regarding a reduction in fair market value of the properties within the project limits based on environmental reasons.

#### 5.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or reasonably ascertainable information (such as past uses, specific chemicals present or once present, spills or other releases, or any environmental cleanups) regarding the properties located within the project limits that would help the environmental professional identify conditions indicative of releases or threatened releases was reported by the user.

#### 5.5 Obvious Indicators of Contamination

The user did not report any knowledge of specific obvious indicators that point to the presence or likely presence of contamination.

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 14

#### 6.0 Records Review

## 6.1 Environmental and Regulatory Agency Records Provided by EDR

Willmer's research of the public records for the corridor includes abstracts of federal databases published by the U.S. Environmental Protection Agency Region 4 for Fulton County, Georgia, state records maintained by GA EPD, and additional standard environmental records for Indian lands and local/regional water resources. This information was provided to Willmer by our subcontractor, EDR. The area used to define the corridor boundaries for purposes of retrieving the public database is presented in the EDR Area/Corridor Report. The corridor area researched was based on the corridor boundaries outlined in the Concept Layout presented in Appendix I. EDR then searched in a radius around the corridor boundaries based on the Approximate Minimum Search Distances listed in the ASTM E1527-13 guidelines. EDR also summarized federal and state databases not included in the ASTM E1527-13 recommended environmental record sources. For a complete listing of all databases reviewed, please refer to the EDR Area/Corridor Report located in Appendix III.

Willmer researched facilities that are located within the search radius around the corridor boundaries. Some of these facilities are not considered RECs due to the nature of the listing, the distance from the limits of construction or topographic relationship to the corridor. Some facilities are identified on more than one database. Additionally, within the same database, a facility may be listed multiple times under different names.

#### **National Priorities List (NPL)**

The Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) established the National Priorities List (NPL) of federal "superfund" facilities. These are the contaminated facilities that have been assigned a high ranking, in terms of potential public health effects, by the EPA.

EDR lists no NPL facilities or delisted NPL facilities within a 1.0-mile distance of the corridor.

#### <u>Superfund Enterprise Management System (SEMS)</u>

SEMS, formerly known as the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS), was renamed in 2015. It contains data on potentially hazardous waste facilities that have been reported to the U.S. EPA and are proposed to or on the NPL.

EDR lists no SEMS facilities within a 0.5-mile distance of the corridor.

#### SEMS (Superfund Enterprise Management System)-ARCHIVE (formerly CERCLIS-NFRAP)

"NFRAP", the EPA database of former CERCLIS facilities where "no further remedial actions are planned" under CERCLA was renamed to SEMS—ARCHIVE (Superfund Enterprise Management System Archive) in 2015. These facilities have been removed and archived from the inventory of CERCLIS facilities. Archived status, indicates, that to the best of EPA's knowledge, assessment at the facility has been completed and that EPA has determined no further steps will be taken to list this facility on the NPL, unless future considerations require a recommendation for listing.

EDR lists two SEMS-ARCHIVE facilities within a 0.5-mile distance of the corridor.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
NATIONAL STARCH & CHEMICAL CORP	195 Ottley Drive	0.100	ENE	H25
FORMER METALICO-EVANS	740 Lambert Drive	0.338	ENE	70

These two facilities are both located beyond the project limits and cross-gradient to the corridor; therefore, any

**GDOT PI No.: 0009395** 

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 15

potential releases from these facilities do not appear likely to impact the corridor and they are not considered to impact the corridor with RECs.

#### **State Hazardous Waste Sites (SHWS)**

The GA SHWS is considered the state and tribal equivalent of CERCLIS. EDR lists no GA SHWS facilities within a 1.0-mile distance of the corridor.

The GA Non-HSI (Hazardous Site Inventory) listing are sites that have reported contamination of soil or groundwater under the Georgia Hazardous Site Response Act (HSRA). These sites were not placed on the Georgia Hazardous Site Inventory because their hazard evaluation scores did not exceed the threshold levels established for sites posing an imminent threat to health or the environment.

EDR lists a total of 28 GA Non-HSI facilities within a 1.0-mile distance of the corridor. Of the these facilities, 26 of them are located beyond the corridor limits and topographically cross-gradient to the corridor and do not appear likely to impact the corridor with a REC. The other two facilities are listed below:

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
OTTLEY DRIVE RAIL SPUR	Former Rail Right-of-Way	0.046	ENE	B14
CROWN CORK & SEAL CO	125 Ottley Dr NE	0.071	S	17

The Ottley Drive Rail Spur was identified by EDR as a GA Non-HSI facility located at "Former rail right-of-way near 200 Ottley Drive". The EDR database mapped the location as approximately 300 feet southeast of the corridor, between Armour Drive and Ottley Drive. The facility was listed by EDR with a report date of 2/17/2010, contamination of 1,2-DCB, a Ground Water Pathway Score of 0.61, and an On-Site Pathway Score of 11.11. During field reconnaissance, no groundwater monitoring wells were noted at the location. It is noted that the Ground Water Pathway Score of 0.61 and On-Site Pathway Score of 11.11 are well below the limits of 10.0 and 30.0, respectively, set by the Georgia EPD in their "Guidance Manual For the Reportable Quantities Screening Method". Since the facility has been evaluated by the Georgia EPD and considered to be a non-hazardous site, it is not considered a REC at this time.

The Crown Cork & Seal Co facility was observed to be a warehouse occupied by a trucking company (Monarch, LLC) during the site inspection. It is discussed in detail in Section 9.0.

#### **Delisted Hazardous Site Inventory Listing (DEL SHWS)**

The DEL SHWS lists information on sites delisted from the Hazardous Site Inventory. EDR lists one facility on the DEL SHWS list within a 1.0-mile distance from the corridor.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
READY MIX USA LLC	340 Armour Drive	0.038	NE	C8

The Ready Mix USA facility is an operating concrete plant adjacent to the proposed trail. It is described in detail in Section 9.0.

#### Resource Conservation & Recovery Information System (RCRIS)

EDR lists RCRA Info that replaces the data recording and reporting abilities of the RCRIS and is the EPA's comprehensive information system providing access to databases including selective information of facilities that generate, transport, store, treat and/or dispose of hazardous wastes. Generators are defined and listed as a large quantity generator (LQG), a small quantity generator (SQG) or very small quantity generator (VSQG). It is noted

**GDOT PI No.: 0009395** 

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 16

that the VSQG list was renamed by EPA in 2020 from the former name of conditionally exempt small quantity generators. EDR lists no facilities on the RCRA-LQG list within a 0.25-mile distance of the corridor. EDR lists three facilities on RCRA-SQG list.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
CARBON INC.	165 Ottley Drive NE	0.112	SE	30
MARTA ARMOUR YARD FACILITY	500 Plasamour Drive	0.169	ENE	P51
NW 251 ARMOUR, LLC	251 Armour Drive	0.006	NE	4

Two of these three facilities are located beyond the project limits and cross-gradient to the corridor and it does not appear that any land acquisition will be required at either facility; therefore, any potential releases from these facilities do not appear likely to impact the corridor and they are not considered to impact the corridor with RECs. The third facility (NW 251 Armour), is adjacent and likely upgradient of the corridor, and was observed to contain a recently renovated but vacant building during the site reconnaissance. It is described in detail in Section 9.0.

EDR lists four facilities on the RCRA-VSQG list within a 0.25-mile distance of the corridor.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
MARTA – ARMOUR SIGN	448 Plasamour Drive	0.198	ENE	Q56
MARTA HEADQUARTERS	2424 Piedmont Rd NE	0.042	NE	D12
MARTA ANNEX	2400 Piedmont Rd N	0.135	NE	K36
PEP BOYS #314	2399 Piedmont Rd	0.153	NE	K48

All of these facilities are located beyond the project limits and cross-gradient to the corridor; therefore, any potential releases from these facilities do not appear likely to impact the corridor and they are not considered to impact the corridor with RECs.

Treatment, Storage and Disposal facilities are found on the TSDF list, and Corrective Action Report (CORRACTS) facilities are handlers with RCRA Corrective Action Activity. EDR lists no facilities on the RCRA-TSDF list within a 0.5-mile distance of the corridor. EDR lists no facilities on the CORRACTS list within a 1.0-mile distance of the corridor.

RCRA Non-Generators (RCRA NonGen) facilities do not presently generate hazardous waste. EDR lists 18 RCRA Non-Gen facilities within a 0.25-mile distance of the corridor. Of these facilities, 12 of them are located beyond the corridor limits and topographically cross-gradient to the corridor, so do not appear likely to impact the corridor with a REC. The other six facilities are listed below.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
HOME DEPOT HD	171 Armour Dr	0.002	ENE	A1
SOUTHERN SIGNATURES	201 Armour Dr	0.004	NE	В3
HOME DEPOT HD0176	515 Garson Dr	0.008	NE	5
ATLANTEL	199 B Armour Dr NE	0.020	ENE	В6
READY MIX USA LLC-	340 Armour Dr	0.038	NE	C8
CROWN CORK & SEAL CO	125 Ottley Dr NE	0.071	S	17

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 17

The Ready Mix Concrete and Crown Cork and Seal facilities are also listed under the SWHS databases and are described in detail in Section 9.0. The Southern Signature, Atlantel and Home Depot HD (aka Specialty Construction) facilities are currently commercial buildings on Armour Drive adjacent to the corridor and are described in detail in Section 9.0.

The Garson Drive Home Depot property is currently occupied by a church, and at the time of the RCRA database listing was a Home Depot retail store. Based on the information in the EDR report, it appears that paint waste was previously generated at this facility, most likely as part of Home Depot retail operations. Therefore, this facility is not expected to cause a REC at the subject corridor.

#### Federal and State Engineering Controls and Institutional Controls Registries

EPA maintains lists of facilities with engineering or institutional controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to eliminate pathways for regulated substances to enter environmental media or adversely affect human health. Institutional controls include administrative measures, such as groundwater and land use restrictions intended to prevent exposure to contaminants on a facility. In Georgia, the GA DNR maintains this list of facilities, along with a list of facilities with AULs.

EDR lists no facilities on the federal institutional controls list or the state AUL list within a 0.5-mile radius of the corridor. EDR lists one facility on the state institutional controls list within a 0.5-mile radius of the corridor.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
CORNERSTONE MEDICAL	1875 1891 1895 and 1901 Peachtree Rd NE	0.430	WSW	W78

This facility is located beyond the project limits and cross-gradient to the corridor; therefore, any potential releases from this facility do not appear likely to impact the corridor and it is not considered to impact the corridor with a REC.

#### **Emergency Response Notification System (ERNS) List**

The ERNS records and stores information on reported releases of oil and hazardous substances reported to various State agencies. EDR lists no properties on the federal ERNS list within a 0.001-mile distance from the corridor.

#### Landfill and/or Solid Waste Disposal Site List - SWF/LF

The listing maintained by the Georgia Department of Natural Resources (GA DNR) of Operating Solid Waste Facilities, was provided by EDR. EDR lists two GA SWF/LF facilities (at the same location) within a 0.5-mile distance of the corridor.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
SUN MEDICAL TECHNOLOGIES	1968 Peachtree Road	0.439	W	Y83
PIEDMONT HOSPITAL	1968 Peachtree Road	0.439	W	Y85

This facility is located beyond the project limits and cross-gradient to the corridor; therefore, any potential releases from this facility do not appear likely to impact the corridor and it is not considered to impact the corridor

**GDOT PI No.: 0009395** 

Atlanta, Fulton County, Georgia 30324
Willmer Project No. 74.4302

Page 18

with a REC.

#### **Leaking Underground Storage Tank List - LUST**

LUST records contain an inventory of reported leaking underground storage tank incidents. GA EPD USTMP maintains lists of LUSTs, which EDR searched as a part of this study. EDR also has a list of RGA-LUST sites compiled from records formerly available from GA EPD.

A regulatory file review of the LUST files at the GA EPD USTMP office was performed by Willmer representative Keith Kaylor on April 18, 2022. Information gained from this review is discussed in Section 9.0 or below, as appropriate.

EDR lists 31 LUST facilities within a 0.5 mile distance of the corridor. Of these, 29 are located beyond the corridor limits and topographically cross-gradient to the corridor, so do not appear likely to impact the corridor with a REC. The two facilities located below are described in detail in Section 9.0.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
SPECIALTY CONSTRUCTION	171 Armour Dr	0.002	ENE	A2
READY MIX USA LLC-MI	340 Armour Dr	0.038	NE	C8

#### Registered Underground Storage Tank List – UST

Registered USTs are regulated under Subtitle I of RCRA and must be registered with the GA EPD USTMP. The GA DNR also maintains a list of facilities required to provide financial assurance for UST facilities. EDR lists 18 UST facilities as currently registered with the state within a 0.25-mile distance of the corridor on the GA EPD USTMP list. Willmer reviewed the online GA EPD USTMP list for cross-reference and the online list confirmed the facilities listed by EDR.

As described in the LUST section, a regulatory file review of the hard copy UST files at the GA EPD USTMP office was performed by Willmer representative Keith Kaylor on April 18, 2022. Information gained from this review is discussed in Section 9.0 or below, as appropriate.

Of the 18 UST facilities listed by EDR and on the GA EPD USTMP list, 14 of them are located beyond the corridor limits and topographically cross-gradient to the corridor and do not appear likely to impact the corridor with a REC. The other four facilities are listed below and described in more detail in Section 9.0.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
ARMOUR DRIVE CONCRETE	342 Armour Dr	0.045	NE	13
SPECIALTY CONSTRUCTION	171 Armour Dr	0.002	ENE	A2
READY MIX USA LLC-MI	340 Armour Dr	0.038	NE	C8
CROWN CORK & SEAL CO	125 Ottley Dr NE	0.071	S	17

#### Aboveground Storage Tanks - AST

Aboveground storage tanks (ASTs) are a listing of Liquid Petroleum (LP) gas tank locations as reported by the State of Georgia Office of Insurance & Safety Fire Commissioner.

The EDR database lists nine AST facilities within a 0.25-mile distance of the corridor. All nine of these facilities are located beyond the corridor limits and topographically cross-gradient to the corridor and do not appear

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 19

likely to impact the corridor with a REC.

#### **Federal and State Brownfields**

Properties on the U.S. Brownfields listing where response actions are planned, ongoing, or completed are maintained by the EPA through the Assessment Cleanup Redevelopment Exchange System (ACRES). ACRES Brownfields listings are obtained from Cleanups in my Community and reported back to EPA, as well as areas that are served by Brownfields grant programs. GA DNR lists properties as brownfields where responses under the Georgia Hazardous Site Reuse and Redevelopment Act are planned, ongoing or completed.

EDR lists four facilities on the Georgia Brownfields list within a 0.5-mile radius of the corridor and no federal Brownfields lists within a 0.5-mile distance of the corridor. Of the four total Brownfields facilities listed by EDR, all of them are located beyond the corridor limits and topographically cross-gradient to the corridor, so do not appear likely to impact the corridor with a REC.

#### **Local Land Records**

EDR searched the Liens 2 Federal CERCLA database to determine if properties within the limits of the corridor have had EPA Superfund monies spent to investigate releases or threatened releases. No listings were reported by EDR.

#### **Tribal Listings**

No tribal listings were reported by EDR within the designated search distances.

#### **Other Listings**

#### **EDR Historical Auto Stations**

EDR categorically searched selected national collections of business directories and corroborated with internet research to produce a list of historical auto stations, which are identified based on categories that might suggest, however not exclusively identify, potential former auto station establishments.

EDR lists five Historical Auto Station facilities within a 0.125-mile radius of the corridor. Of these facilities, four of them are located beyond the corridor limits and topographically cross-gradient to it, so do not appear likely to impact the corridor with a REC. The other facility listed below is located within or adjacent to the corridor limits.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.
PIEDMONT GARAGE	2162 Piedmont Rd NE	0.031	ENE	7

This facility was listed by EDR as a historic auto facility from 1937 named "Piedmont Garage" which performs "Automobile Repairing". No other information was provided by EDR. The historic aerials indicate that the existing apartment complex at 2162 Piedmont Road was constructed in approximately 2015, and the site was previously occupied by an earlier apartment complex that was constructed on previously undeveloped land between 1938 and 1949. No evidence of a former auto repair station was noted during field reconnaissance. It is additionally noted that EDR mapped the 2162 Piedmont Garage address south of the corridor and across Peachtree Creek from the corridor limits (currently the rear portion of the 2170 Piedmont Road property). Therefore, any potential releases from this former facility would flow into Peachtree Creek before reaching the corridor. Since EDR's listing appears contradicted by the historic aerial photography and any potential releases do not appear likely to migrate

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 20

to the corridor, this facility is not considered a REC at this time.

#### **GA DRYCLEANERS and EDR Historical Dry Cleaners**

The GA DNR maintains a list of drycleaners in the state (GA DRYCLEANERS). The listing includes drycleaner facilities that use perchloroethylene which responded to the Notification of Compliance Status forms. The listing also includes businesses that are pick-up stores only and do not conduct dry cleaning onsite.

EDR also categorically searched selected national collections of business directories and corroborated with internet research and proprietary information to produce a list of historical cleaners, which are identified based on categories that might suggest, however not exclusively identify, dry cleaning establishments (EDR Historical Dry Cleaners).

EDR lists one facility on the GA DRYCLEANERS within a 0.25-mile radius of the corridor and three facilities on the EDR Historical Dry Cleaners list within a 0.125-mile radius of the corridor. Of these four facilities listed by EDR, three of them are located beyond the corridor limits and topographically cross-gradient to the corridor and do not appear likely to impact the corridor with a REC. The other facility listed below is located within or adjacent to the corridor limits and is described in more detail in Section 9.0.

Facility Name	Address	Distance (mile)	Direction from Corridor	EDR Map ID.	EDR Focus Map
ROAD ONE	340 Armour Dr NE	0.037	E	D20	5

#### **SPILLS**

The Emergency Response Incident Reporting System is reported by the Georgia Department of Natural Resources and provides a list of spills (SPILLS). An additional database, SPILLS 90, includes spills recorded after 1990. EDR lists no sites on these lists within a 0.125-mile radius of the property.

#### **Unplottable Facilities**

EDR's Orphan Summary and Zip Code Scan Summary identified 12 facilities potentially located near the corridor. Orphan facilities are often addressed but have not been plotted due to improper geocoding. Based on a brief review of the listed addresses, it does not appear that any of the Orphan facilities are located within the corridor limits.

#### U.S. EPA Enforcement & Compliance History Online (ECHO)

ECHO can be used to determine whether compliance inspections have been conducted at regulated facilities by U.S. EPA or State/local governments, if violations have been detected during these inspections and if any enforcement actions have been taken and penalties have been assessed in response to environmental law violations (Reference 8).

The EDR report lists 14 facilities from the ECHO database. All of these facilities are also listed under other databases discussed above, mostly consisting of RCRA generators and RCRA Non-generators.

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 21

#### 7.0 Field Reconnaissance

Willmer representative Keith Kaylor conducted field reconnaissance of the corridor on April 29, 2022. Field reconnaissance consisted of walking and driving tours of the corridor, observation of the exterior only of each building (where available), interviews with the current tenants, if possible, and a windshield survey of the surrounding buildings and properties. The results of our field observations are summarized in the following paragraphs. Photographs of the properties and adjoining properties were taken and are on file at Willmer. Select photographic images are included in Appendix II.

#### 7.1 Storage Tanks

No USTs or ASTs were observed during the field investigation within the corridor limits.

#### 7.2 Hazardous and Petroleum Products Containers/Drums

No drums or other containers of hazardous materials or petroleum products were observed within the corridor during the site inspection.

#### 7.3 Heating and Cooling Fuels and Chemicals

The HVAC systems for buildings that could be observed from the street appeared to be placed at-grade adjacent to the structures or on the roofs of structures.

#### 7.4 Solid Waste

Solid waste at the properties adjacent to the corridor appeared to be containerized within typical commercial-type dumpsters or residential-type trash cans.

No other solid waste was noted at properties within the corridor limits.

#### 7.5 Sewage Disposal/Septic Tanks

No septic tanks were observed within the corridor limits or on the properties adjacent to the corridor. Based on pavement utility markings, it appears that the commercial properties located along the corridor are on a municipal sewer system. A call to the City of Atlanta, Department of Watershed Management to discuss the potential of septic facilities within the corridor was not returned.

#### 7.6 Hydraulic Equipment

No properties were observed during the field investigation to have repair bays with hydraulic lifts. However, a number of properties were observed to have roll-up doors and we were not able to ascertain if hydraulic equipment was present.

#### 7.7 Contracted Maintenance Services

It is unknown if contracted maintenance is employed at any of the properties within the corridor limits.

#### 7.8 PCBs in Electrical Transformers

Electrical transformers observed adjacent to the properties within the corridor limits are served by Georgia Power. Georgia Power is responsible for their maintenance and for cleanup of any releases from leaks or incidents.

Willmer has previously contacted Georgia Power and various local EMCs to discuss the issue of PCBs in electrical transformers within the state of Georgia. During those conversations, the responsible engineers have stated that

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 22

companies do not maintain lists of transformers that have PCBs and the only way to tell if a given transformer contains PCBs is to visit the property and open it. However, both Georgia Power and other local EMCs have informed Willmer that they regularly replace older transformers with new PCB-free versions and very few of the old PCB-containing transformers are still in use. Therefore, as a rule, it is "99.9% likely that transformers do not have PCBs." As noted, in the event of a release, the responsible utility company conducts the cleanup and remediation.

#### 7.9 Water Supply and Wells

No water wells could be observed from the street within the corridor limits or on the properties adjacent to the corridor. No water wells were observed within the corridor limits or on the properties adjacent to the corridor. Based on pavement utility markings, it appears that the commercial properties located along the corridor are on a municipal water system. A call to the City of Atlanta, Department of Watershed Management to discuss the water supply facilities within the corridor was not returned.

#### 7.10 Drains and Sumps

No drains or sumps were visible on the properties adjacent to the corridor based on observation from the roadways.

#### 7.11 Pits, Ponds, Lagoons and Surface Waters

Peachtree Creek is located within the corridor limits, as discussed in Section 3.0. No other surface water bodies were observed on any properties within the corridor limits.

#### 7.12 Staining/Corrosion

Minor staining apparently from vehicle leaks was observed on portions of pavement located along the Armour Drive roadway at various locations. The level of staining observed appeared to be minor and not likely to be the subject of an enforcement action if brought to the attention of the appropriate governmental agency.

#### 7.13 Stressed Vegetation

Indications of stressed vegetation from hazardous wastes or petroleum hydrocarbons were not visible on the properties within the corridor limits.

#### **7.14** Odors

No odors were noted during field reconnaissance.

#### 7.15 Monitoring Wells

No groundwater monitoring wells were observed within the corridor limits during the site inspection.

Atlanta, Fulton County, Georgia 30324
Willmer Project No. 74.4302

Page 23

# 8.0 Interviews with Knowledgeable Persons

#### 8.1 Interviews with Current Owner/ Occupants

Property owners and occupants were not available for interviews during field reconnaissance. The occupants of 171 Armour Drive (Specialty Construction / Home Depot/ Cinemassive), 201 Armour Drive (Southern Signatures/ Atlanta Track Club), and 199B Armour Drive (Atlantel/ American Spirit Works) by telephone, but a response was not received in time for inlusion in this report.

#### 8.2 Interviews with Surrounding Property Owner/ Occupants

No surrounding property owners or occupants were available for interviews.

#### 8.3 Interviews with Local Government Officials

An open records request was submitted by a Willmer representative to the City of Atlanta, Department of Open Records via the online request form on April 22, 2022. Information regarding reported incidents of chemical fires, hazardous waste or material spills, or other environmental impacts to the properties located along Armour Drive within the corridor limits was requested. As of the date of this report, no response has been received. If any response is received, it will be reviewed, and we will issue a follow-up letter to this report if the department's response impacts our conclusions.

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 24

# 9.0 Onsite Properties of Environmental Concern

Five facilities are identified as potential onsite properties of recognized environmental concern adjacent to the limits of the project based upon review of the public record, field reconnaissance and/or interviews with owners/occupants. All properties were evaluated based upon the guidance contained in the *GDOT UST and Hazardous Waste Site Procedures, Policy 5525-1*, which states that GDOT requires "suspected hazardous waste sites...must be thoroughly investigated to determine conclusively that hazardous waste is not present before any right-of-way is purchased."

#### 9.1 Argos Concrete Plant / Ready Mix Concrete

The existing Argos Concrete Plant at 342 Armour Drive is located northwest of Armour Drive. The facility is listed under various names including Argos, Ready-Mix LLC, Armour Drive Concrete Plant, and Argos Ready Mix LLC. It is noted that the property is listed at a variety of addresses including 340 Armour Drive, 342 Armour Drive, 348 Armour Drive, and 358 Armour Drive in various records. The proposed corridor runs northward immediately south and west of the plant, before passing over a set of railroad tracks and Peachtree Creek. The combined EDR listings of the four properties composing the facility are UST, SHWS, LUST, RCRA NonGen, EDR Historic Cleaner lists and the ECHO database.

The property was observed during field reconnaissance to be occupied by an operating concrete plant, a one-story brick office building, and other associated structures such as concrete silos. No drums or containers were noted during field reconnaissance.

Topographic maps indicate the property area has a low spot in its northwest portion, but otherwise generally slopes to the north towards Peachtree Creek. The railroad immediately north of the property appears to have been constructed prior to 1888. The portion of Armour Drive south/east of the property appears to have been constructed between 1895 and 1927. With the exception of the roadway construction of Armour Drive, no major changes are noted to the topography between 1888 and present day.

Historical aerial photography from 1938 to 1955 depicts the property with three large buildings of unknown use. Between 1955 and 1960, the buildings were removed, and the property left unoccupied. Between 1960 and 1968, the property was developed in a layout that appears to generally match the current property layout observed during field reconnaissance. No major changes to the property layout are noted between 1968 and present day.

The property addresses of 340 through 358 Armour Drive were listed in the City Directories provided by EDR between 1961 through 2017 under a variety of names including Fleet Transport, Lafarge Building Materials, and Signal Mountain Cement. According to Wikipedia, both Lafarge Building Materials and Signal Mountain Cement were companies which formerly produced cement, aggregates, and concrete.

The Fulton County Tax Assessor's website lists the property as a commercial property identified as a "Warehouse (bulk)" addressed at 340 Armour Drive and owned by Bright Hour Trust. The Tax Assessor information lists the facility with a shed and asphalt parking lots built in 1960, and a second shed built in 1980. The Tax Assessor lists the facility at 348 Armour Drive as a separate facility owned by Signal Mountain Sales which includes a variety of warehouses, support areas, offices, and docks. Based on the map shown by the Tax Assessor's website, it appears that the office and storage portion of the concrete plant is addressed as 340 Armour Drive, while the actual concrete plant itself is addressed at 348 Armour Drive. However, based on the historical aerials and database records, it appears that at one time, the concrete plant was present on both properties. Therefore, for purposes of this evaluation, both properties will be considered as a single combined property.

The online Georgia EPD USTMP list and confirmed in the EDR database identifies the address with two former

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 25

USTs "Removed from Ground", one former UST "Temporarily Out of Use" and one 10,000-gallon diesel UST "Currently In Use". The Georgia EPD Corrective Action Projects list identifies two former LUSTs with releases in 1993 and 1996, both of which were granted No Further Action (NFA) status in 1997.

The facility was also reported by the original Phase I ESA EDR report (August 2020) on the SHWS list, with, "a known release of Lead in soil at levels exceeding the reportable quantity" and "requiring corrective action". The April 2022 EDR report lists the site as a deleted SHWS site. The facility was also listed on the VCP list as formerly containing a voluntary cleanup.

The facility was listed on the ECHO database with an operating "Synthetic Minor Emissions" permit under the Clean Air Act, and a "Toxics Release Inventory" permit last reported in 2019. No history of violations or inspections is reported in the EDR database.

A review of the hard-copy files performed by Willmer as maintained by the GA EPD USTMP was performed on April 18, 2022. The information in the hard copy files confirms the facility has one UST, currently listed as in use, containing diesel fuel. The information also describes the former presence of two LUSTs at the facility which were granted NFA status. The NFA status was based on soil and groundwater samples collected from the site which showed that contamination from the LUSTs did not exceed applicable regulatory limits.

Due to the current and reported former use of the property as a concrete plant, a current, in-use UST, and a reported history of LUSTs and contamination of soil with lead, Willmer characterizes this property as a REC. At this time, the final right-of-way drawings have not been established; however, once they are, Willmer recommends a Phase II investigation to evaluate the areas required for right-of-way acquisition and easements as part of the corridor. It is also noted that the facility is reported in the ECHO database with an active air permit, which, while not an issue that affects the Phase II investigation, should be considered by the contractor during construction and evaluated for potential to impact construction activities.

#### 9.2 Specialty Construction / Home Depot

The existing light industrial building (formerly Specialty Construction) at 171 Armour Drive was reported by EDR on the RCRA NonGen/NLR, LUST, UST, and TIER 2 lists. It appears that the corridor is across the street from this facility, but based on the drawings, it appears that the corridor may also require land acquisition from this property. The facility is listed by EDR as "Specialty Construction Products" and "Home Depot WD". EDR reported the facility on the RCRA NonGen/NLR list with ignitable waste, corrosive waste, mercury, benzene, and a variety of spent nonhalogenated solvents, with reporting dates between 2003 and 2005. The UST information reported by EDR states that the facility formerly contained one UST "Removed from Ground" in 2003 with a status of "NFA – Clean Closure".

During the site reconnaissance for the original Phase I ESA in September 2020, the property was observed to be an active construction site. During the current field reconnaissance, it was observed to be a light industrial building occupied by a video display firm (Cinemassive). No evidence of the property's former use was noted and no evidence of hazardous materials was observed. The facility was closed on the day that field reconnaissance occurred, and no interviews were conducted with the staff. Willmer attempted to contact the staff of this facility by telephone and email, but no response was received in time for inclusion in this report.

Topographic maps indicate the property surface water flow and groundwater gradient are directed north/northwest, across Armour Drive and towards a tributary of Peachtree Creek. No major changes are noted to the topography between 1888 and present day.

Historical aerial photography from 1938 to 1949 depicts the property as an undeveloped wooded area. Between

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 26

1949 and 1955, Armour Drive was constructed adjacent to the property and the property was cleared and graded. Between 1955 and 1960, one building was constructed on the property. No changes are noted to the building or property layout between 1960 and 2019. It appears that the construction project observed in September 2020 included an addition to the west side of the building.

The property address of 171 Armour Drive was not listed in the City Directories provided by EDR.

The Fulton County Tax Assessor's website lists the property as a commercial property identified as a "Warehouse (bulk)" addressed at 171 Armour Drive, owned by 171 Armour LLC. The Tax Assessor information lists the facility with an office building, warehouse, and loading dock, but does not identify the date these structures were constructed.

The online Georgia EPD USTMP list identifies the address with one former UST "Removed from Ground". The Georgia EPD Corrective Action Projects list identifies the facility with one LUST with a status of "NFA — Clean Closure".

A review of the hard-copy files performed by Willmer as maintained by the GA EPD USTMP was conducted on April 18, 2022. The information in the hard copy files confirms the facility had one former UST "Removed from Ground". The information did not indicate a release from the former UST; however, the facility was granted "NFA – Clean Closure" status in 2012.

While the facility does not appear to currently contain any hazardous materials, due to the reported former presence of a UST at the facility and a variety of solvents, Willmer characterizes this property as a REC. It appears that land acquisition may be required at this facility for the future corridor construction; hence a Phase II investigation should be performed to evaluate the area required for land acquisition.

#### 9.3 Southern Signatures

The Southern Signatures facility at 201 Armour Drive was reported by EDR on the RCRA NonGen/NLR, AIRS, and ECHO lists. It appears that the proposed corridor is across the street from this facility. The concept drawings indicate that the corridor may also require land acquisition from this property. EDR reported the facility on the RCRA NonGen/NLR list with ignitable waste and a variety of spent nonhalogenated solvents, with a reporting date of 1992. The ECHO listing for this facility identifies the facility with a "Permanently Closed Minor Permit" under the Clean Air Act and as an "Inactive" facility under RCRA. No history of violations or enforcement actions within the past five years is listed in the ECHO database.

The property was observed during field reconnaissance to contain a one-story brick building occupied by the Atlanta Track Club, a gym and health facility. No evidence of the property's former use was noted and no evidence of hazardous materials was observed. Willmer attempted to contact the staff of this facility by telephone, but no response was received in time for inclusion in this report.

Topographic maps indicate that stormwater flow from the property would be toward the north/northwest, across Armour Drive and towards a tributary of Peachtree Creek. No major changes are noted to the topography between 1888 and present day.

Historical aerial photography from 1938 to 1949 depicts the property as undeveloped and wooded. Between 1949 and 1955, Armour Drive was constructed adjacent to the property and the property was cleared and left graded. Between 1955 and 1960, one building was constructed on the property. No changes are noted to the building or property appearance between 1960 and 2019. The property layout shown in the most recent aerial photograph dated December 2020 appears to match the current property configuration observed during field reconnaissance.

Phase I Environmental Site Assessment (Rev. 1)
Atlanta BeltLine Corridor, Northeast Trail
GDOT PI No.: 0009395
Atlanta, Fulton County, Georgia 30324

Willmer Project No. 74.4302

Page 27

In the City Directories provided by EDR, the property address of 201 Armour Drive was not listed in 1957, 1961, 1965, and 1971. The facility was listed as a paper company in 1976, vacant in 1981, SOS Printing in 1986, Turner Millner Printing in 1991, Southern Signatures in 1994 and 1999, and Mason Murer Fine Art in 2005.

The Fulton County Tax Assessor's website lists the property as a commercial property identified as a "Warehouse (bulk)" addressed at 201 Armour Drive, owned by Atlanta Track Club Properties, LLC. The Tax Assessor information lists the facility with a warehouse, but does not identify the date the building was constructed.

The facility was listed in EDR's database as a non-generator of hazardous waste from 1992. Other information about the facility in the ECHO database states that the facility is "Inactive" and no longer has active air permits. Neither EDR nor the ECHO database indicated any continuing presence of hazardous materials, nor is there any indication of the property being impacted with required environmental controls. Therefore, the former presence of this facility as a non-generator of hazardous waste is classified as a HREC and no Phase II investigation is recommended at this time.

#### 9.4 Atlantel

The Atlantel facility at 199B Armour Drive was reported by EDR on the RCRA NonGen/NLR list. It appears that the proposed corridor is across the street from this facility, but based on the drawings, it appears that the corridor may also require land acquisition from this property. EDR reported the facility on the RCRA NonGen/NLR list with ignitable waste and a variety of spent nonhalogenated solvents, with a reporting date of 2002. The RCRA NonGen/NLR listing provided by EDR also states that "No violations found".

The property was observed during field reconnaissance to be a one-story white brick building used by American Spirit Works, a craft whiskey distillery. No evidence of the property's former use was noted and no evidence of hazardous materials was observed. Willmer attempted to contact the staff of this facility by telephone and email, but no response was received in time for inclusion in this report.

Topographic maps indicate that stormwater flow from the property is toward the north/northwest, across Armour Drive and directed to a tributary of Peachtree Creek. No major changes are noted to the topography between 1888 and present day.

Historical aerial photography from 1938 to 1949 depicts the property as an undeveloped wooded area. Between 1949 and 1955, Armour Drive was constructed adjacent to the property and the property was cleared and graded. Between 1955 and 1960, one building was constructed on the property. No changes are noted to the building or property layout between 1960 and 2019. The property layout shown in the most recent aerial photograph dated December 2020 appears to match the current property plan observed during field reconnaissance.

In the City Directories provided by EDR, the property address of 199 Armour Drive was not listed in 1957. The address was listed as part of Chrysler's Airtemp Division in 1961 and 1965, a United States Research Corp. in 1971, the Schaefer Sash and Door company in 1976, Hunt Philip A Chemicals in 1981, a warehouse and distribution company in 1986, vacant in 1991, Renu Enterprises in 1994 and 1999, and Atlantel in 2005.

The Fulton County Tax Assessor's website lists the property as a commercial property identified as a "Warehouse (bulk)" addressed at 199 Armour Drive, owned by Armour 199 LLC. The Tax Assessor information identifies the facility containing a light manufacturing building. The date of the building's construction is not provided.

The facility was listed in EDR's database as a non-generator of hazardous waste from 2002. The EDR database did not identify any violations or environmental controls at the facility. The facility is not listed in the ECHO database or other sources. During field reconnaissance, no evidence of hazardous materials was noted. However, based on

Phase I Environmental Site Assessment (Rev. 1)
Atlanta BeltLine Corridor, Northeast Trail
GDOT PI No.: 0009395
Atlanta, Fulton County, Georgia 30324

Willmer Project No. 74.4302 Page 28

the listed uses in the City Directory, it is possible that chemicals may have been present during previous uses from former tenants. Therefore, this facility is classified as a HREC and a Phase II investigation is recommended.

#### 9.5 Crown Cork and Seal

The Crown Cork and Seal facility at 125 Ottley Drive was reported by EDR on the GA Non-HSI, UST, SPILLS, and RCRA NonGen/NLR lists. It appears that the proposed corridor is located immediately northwest of this facility.

EDR reported the facility on the GA Non-HSI list with a report date of 2/1/1999. The type of contamination is "not reported" and no other information about the Non-HSI listing is included. The facility is also reported with six former USTs "Removed from Ground". The facility is on the RCRA NonGen/NLR list with ignitable waste, a variety of spent nonhalogenated solvents, and "emission control dust/sludge from secondary lead smelting". The reporting dates ranged from 1990 to 1994. The RCRA NonGen/NLR listing states that the facility has received two Notices of Violation on 9/12/1990 and achieved compliance in 2/5/1991.

The property was observed during field reconnaissance to be a warehouse with office space occupied by Monarch, LLC. During the site reconnaissance for the original Phase I ESA in September 2020, two 30-gallon drums of unknown contents were observed west of the building, but these drums were not present during the April 2022 site reconnaisance.

Topographic maps indicate flow from the property is westward towards a tributary of Peachtree Creek and south towards the railroad and I-85. No major changes are noted to the topography between 1888 and present day.

Historical aerial photography from 1938 to 1949 depicts the property as an undeveloped wooded area. Between 1949 and 1955, Armour Drive was constructed adjacent to the property and the property was cleared and graded. Between 1960 and 1968, a building was constructed on the property which appears to match the current building observed during field reconnaissance. No changes are noted to the building or property layout between 1968 and 2019. The property condition shown in the most recent aerial photograph dated December 2020 appears to match the current property layout observed during field reconnaissance.

In the City Directories provided by EDR, the property address of 125 Ottley Drive was not listed in 1961 and 1965. The address was listed as Georgia-Pacific Corp in 1971, vacant in 1976, Crown Cork and Seal in 1981, 1986, 1994, 1999, and Classic Design Services in 2005.

The Fulton County Tax Assessor's website lists the property as a commercial property identified as a "Warehouse (bulk)" addressed at 125 Ottley Drive, owned by 125 Ottley Drive LLC. The Tax Assessor information lists the facility with a multi-use office. The date of the building's construction was not listed.

The online Georgia EPD USTMP list identifies the address with six former USTs "Removed from Ground". The Georgia EPD Corrective Action Projects list does not list the facility address.

A review of the hard-copy files performed by Willmer as maintained by the GA EPD USTMP was performed on April 18, 2022. The hard copy files confirm the facility had six former USTs "Removed from Ground", with no information on removal dates. No information about leaks or releases was noted in the hard copy files.

Due to the facility being formerly listed on the Non-HSI list, with a history of violations under RCRA, and with six former USTs, Willmer characterizes this property as a REC. Therefore, Willmer recommends a Phase II investigation to evaluate the areas required for right-of-way acquisition and easements as part of the corridor.

#### 9.6 NW 251 Armour, Inc.

The NW 251 Armour, Inc facility at 251 Armour Drive was reported by EDR on the GA SQG list. It appears that the

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 29

proposed corridor is across the street from this facility. The concept drawings indicate that the corridor may also require land acquisition from this property. EDR reported the facility on the RCRA Small Quantity Generator list with a waste type of "Lead", and a business type of "Remediation Services". No notices of violation or releases are listed, and the facility is not listed on any other databases.

The property was observed during field reconnaissance to be a recently renovated and vacant commercial building. No evidence of the property's former use was noted and no evidence of hazardous materials was observed.

Topographic maps indicate that stormwater flow from the property is toward the north/northwest, across Armour Drive and directed to a tributary of Peachtree Creek. No major changes are noted to the topography between 1888 and present day.

Historical aerial photography from 1938 to 1949 depicts the property as an undeveloped wooded area. Between 1949 and 1955, Armour Drive was constructed adjacent to the property and the existing building was constructed on the property. No changes are noted to the building or property layout between 1955 and 2019. The property layout shown in the most recent aerial photograph dated December 2020 appears to match the current property plan observed during field reconnaissance.

In the City Directories provided by EDR, the property address of 251 Armour Drive was listed as containing Phillip Casey (a roofing manufacturer) in 1957 to 1965, the Industrial Traffic Association in 1971, vacant in 1976, and Los Amigos Tortillas from 1981 to 2005.

The Fulton County Tax Assessor's website lists the property as a commercial property identified as a "Warehouse (distribution)" addressed at 251 Armour Drive, owned by NW 251 Armour LLC. The date of the building's construction was not listed.

The facility was listed in EDR's database as a small quantity generator of hazardous waste in 2021. AS there are no other entries in the EDR database, it appears that this entry is from a one-time generation of waste, such as a lead-based paint removal project. There are no other records indicating the presence of hazardous materials, nor is there any indication of the property being impacted with required environmental controls. Therefore, the former presence of this facility as a small quantity generator of hazardous waste is not classified as a REC and no Phase II investigation is recommended at this time.

Phase I Environmental Site Assessment (Rev. 1) **Atlanta BeltLine Corridor, Northeast Trail GDOT PI No.: 0009395** 

Atlanta, Fulton County, Georgia 30324 Willmer Project No. 74.4302

Page 30

### 10.0 Offsite Evaluations

The Phase I ESA findings and observations indicated no offsite properties of recognized environmental concern appear to exist outside of the limits of the corridor that would impact the corridor as reported by H&L and observed by Willmer during field reconnaissance.

Phase I Environmental Site Assessment (Rev. 1)
Atlanta BeltLine Corridor, Northeast Trail
GDOT PI No.: 0009395

Atlanta, Fulton County, Georgia 30324

Willmer Project No. 74.4302

Page 31

### 11.0 Evaluations

### 11.1 Findings

This Phase I ESA conducted detailed evaluations of the six properties listed below, as potential REC facilities located within the proposed limits of the Northeast Trail corridor. Four of the properties were determined to have RECs.

### **Properties Identified for Further Environmental Investigation**

EDR Map ID No.¹	Property Description	Address	EDR Databases <sup>2</sup>	Further Investigation Required	Report Discussion Section No.
C8,C9,	Ready Mix USA, Inc. / Armour Drive Concrete	340 - 342 Armour Drive NE	UST, SHWS, GA VCP, LUST, UST, RCRA NonGen, EDR Hist Cleaner	Yes	9.1

4	NW 251 Armour, LLC	251 Armour Drive	RCRA-SQG	No	9.6
Notos					

### Notes:

No "full take" property acquisition is anticipated by this corridor work. However, other potential onsite environmental issues may include the presence of PCB-containing transformers, ACM, LBP, and inactive wells and/or septic systems which may require proper abandonment and closure. These concerns may require additional assessment if affected by the proposed project to adhere to applicable Federal, State and/or local regulations protective of the general public health, safety and welfare during construction activities.

### 11.2 Opinions

The database review, field reconnaissance, interviews and adherence to ASTM E1527-13 and GDOT Policy 5525-1 directed the selection of the properties identified in Table 1 for Phase II investigation (see Figure 2). The Phase II investigation will be in conformance with the scope and limitations of ASTM Practice E1903-19 for Phase II Investigations and GDOT's *Environmental Site Assessment: Phase II Guidelines*, to determine what, if any, environmental impacts exist to soil and/or groundwater (if encountered). This investigation should be completed prior to right-of-way acquisition and construction.

### 11.3 Conclusions

We have performed a Phase I Environmental Assessment in conformance within the scope and limitations of ASTM Practice E1527-13 and GDOT Policy 5525-1 of the proposed Northeast Trail corridor. Any deviations from or exceptions to this practice are described in Sections 2.5 and 2.6 of this report. This assessment has revealed no evidence of REC in connection with the corridor except for the following:

<sup>&</sup>lt;sup>1</sup> See Table 1

<sup>&</sup>lt;sup>2</sup> UST – Underground Storage Tank; SHWS – State Hazardous Waste Sites; LUST – Leaking Underground Storage Tank; GA Non-HSI – Georgia Non-Hazardous Site Inventory; GA VCP – Georgia Voluntary Cleanup Program; ECHO – Enforcement and Compliance History Online; RCRA – Resource Conservation and Recovery Act (Hazardous Waste generators)

Phase I Environmental Site Assessment (Rev. 1)
Atlanta BeltLine Corridor, Northeast Trail
GDOT PI No.: 0009395
Atlanta, Fulton County, Georgia 30324

Willmer Project No. 74.4302

Page 32

- A Phase II subsurface investigation should be conducted at the four REC properties listed in Table 1 to
  determine if they are environmentally impacted by hazardous substances and/or petroleum products.
  The Phase II investigation should be performed within rights-of-way and/or easements to be acquired,
  prior to initiation of construction activities. The Phase II investigation should follow the ASTM Practice
  E1903-19 guidelines. For the portions of the work subject to GDOT guidelines, GDOT's Environmental Site
  Assessment: Phase II Guidelines should also be followed.
- Although non-scope issues such as ACM and LBP are not part of a Phase I ESA, if any structures are
  determined to require demolition or renovation as part of the corridor, a comprehensive survey should
  be conducted of these structures by Georgia certified inspectors to determine the presence of ACM and
  LBP prior to construction activities within the corridor. ACM and LBP material removal and disposal must
  be conducted by a certified abatement contractor in accordance with applicable Federal, State, and local
  regulations.
- The electrical utility provider, Georgia Power, should be contacted regarding the potential for PCBcontaining fluids within the electrical transformers installed before 1980 prior to their removal or relocation.
- Upon discovery of any subsurface features (i.e., wells, USTs, and/or septic systems) at any property
  whether identified as a property with a recognized environmental condition or not, these subsurface
  features should be closed and/or removed in accordance with Federal, State, and local regulations, if
  applicable.

### 11.4 Environmental Professional

### 11.4.1 Restrictions

This report was prepared for the exclusive use of Heath & Lineback Engineers, Inc. on behalf of Atlanta BeltLine Inc. and the Georgia Department of Transportation and is intended to provide a Phase I Environmental Site Assessment of the Atlanta BeltLine Corridor, Northeast Trail. Any use which a third party makes of this report, or any reliance on or decisions to be made based on it, are the responsibility of the third party. Should additional parties require reliance on this report, written authorization from Willmer will be required. With respect to third parties, Willmer has no liability or responsibility for losses of any kind whatsoever, including direct or consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The report is based on data and information collected by Willmer during the Phase I Environmental Site Assessment of the property. It is based solely on the conditions of the proposed project encountered at the time of the field reconnaissance on September 4, 2020 and April 29, 2022, supplemented by a review of historical information and data obtained by Willmer as described in this report, and discussions with a representative of the owner/occupant of properties, as reported herein. Except as otherwise may be specified, Willmer disclaims any obligation to update this report for events taking place, or with respect to information that becomes available to Willmer after the time during which Willmer conducted the Phase I Environmental Site Assessment.

In evaluating the proposed project, Willmer has relied in good faith on information provided by other sources and individuals noted in this report. Willmer used that information provided as factual and accurate. In addition, the findings in this report are based, to a large degree, upon information provided by the current owners/occupants of properties located within the limits of the proposed project. Willmer accepts no responsibility for any deficiency, misstatement or inaccuracy contained in this report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted.

Willmer makes no other representations whatsoever, including those concerning the legal significance of its findings, or as to other legal matters touched on in this report, including, but not limited to, ownership of any property, or the application of any law to the facts set forth herein. With respect to regulatory compliance issues, regulatory statutes are subject to interpretation and change. Such interpretations and regulatory changes should be reviewed with legal counsel.

This report is subject to the further qualifications contained herein. We trust that the information presented in this report meets your current requirements. Should you have any questions or concerns, please do not hesitate to contact the authors.

### 11.4.2 Environmental Professionals' Statement

The following environmental professionals produced this environmental assessment and we declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property (Appendix IX). We have developed and performed all the appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

### **EXECUTIVE SUMMARY**

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### **EXECUTIVE SUMMARY**

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### **DATABASES WITH NO MAPPED SITES**

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### STANDARD ENVIRONMENTAL RECORDS

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2022 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

#### Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 4 RCRA-VSQG sites within approximately 0.25 miles of the target property.

### Lists of state and tribal landfills and solid waste disposal facilities

GA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Natural Resources' Operating Solid Waste Facilities' list.

A review of the GA SWF/LF list, as provided by EDR, and dated 07/21/2021 has revealed that there are 2 GA SWF/LF sites within approximately 0.5 miles of the target property.

## Lists of state and tribal registered storage tanks

GA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Natural Resources' Underground Storage Tank Database.

A review of the GA UST list, as provided by EDR, and dated 07/08/2021 has revealed that there are 18

GA UST sites within approximately 0.25 miles of the target property.

#### State and tribal institutional control / engineering control registries

GA INST CONTROL: Sites on the Public Record Listing that have institutional controls or limitations on use are sites with Risk Reduction Standards of 3, 4, and 5.

A review of the GA INST CONTROL list, as provided by EDR, and dated 11/01/2021 has revealed that there is 1 GA INST CONTROL site within approximately 0.5 miles of the target property.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that

there are 18 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Click Here:

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. AIR MINOR

Status of Cleanup Activities: Investigations are being conducted to determine how much cleanup is

necessary for source materials, soil, and groundwater.

GA EPD Dir Determination Re Correction Action:

RS Released/Threats to Health Env:

The Director has determined that this site requires corrective action. This site has a known release of Lead in soil at levels exceeding the reportable quantity. This site has limited access. The nearest resident individual is less than 300 feet from the area affected by

the release.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of **EDR ID Number**

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

GEIMS (Geographic Environmental Information Management System) provides the EPA and Public a single point of access to core data for all facilities and sites regulated or monitored by the EPA and a single system for the reporting of all environmental data.

AIR - NOT APPLICABLE

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code: F001

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE,

1.1.1-TRICHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE,
1.1.1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED

IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL

KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF

THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

#### Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

## Lists of state- and tribal hazardous waste facilities

SHWS: Hazardous Site Inventory

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/01/2021 Date Data Arrived at EDR: 07/06/2021 Date Made Active in Reports: 09/24/2021

Number of Days to Update: 80

Next Scheduled EDR Contact: 07/04/2022 Data Release Frequency: Annually

NON HSI: Non-Hazardous Site Inventory

This list was obtained by EDR in 1998 and contains property listings that have reported contamination of soil or groundwater under the Georgia Hazardous Site Response Act (HSRA). These sites were not placed on the Georgia Priority list (Hazardous Site Inventory or HSI) because their hazard evaluation scores did not exceed the threshold levels established for sites posing an imminent threat to health or the environment. Disclaimer provided by Rindt-McDuff Associates - the database information has been obtained from publicly available sources produced by other entities. While reasonable steps have been taken to insure the accuracy of the data, RMA does not guarantee the accuracy of the data. No claim is made for the actual existence of pollution at any site. This data does not constitute a legal opinion.

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014

Next Scheduled EDR Contact: 05/16/2022 Data Release Frequency: Quarterly

#### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

#### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

**Nursing Homes** 

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

**Public Schools** 

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are

comparable across all states.

Private Schools

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Willmer Engineering, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

A preliminary search of the Complete Sanborn Library collection has been conducted, and fire insurance maps covering the target property location provided by Willmer Engineering, Inc. were identified for the years listed below. Certified Sanborn Map search results will be provided in the final version of this report. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by Sanborn Library LLC, the copyright holder for the collection.

#### Preliminary Sanborn Results:

Site Name:4302 Beltline NE TrailAddress:4302 Beltline NE TrailCity, State, Zip:Atlanta, GA 30324

**Cross Street:** 

P.O.#

**Project:** 74.4302

**Certification #** Provided with final report

Maps Identified:

#### **UNMAPPED PROPERTY**

This document certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client-supplied target property information, and fire insurance maps covering the target property were not found.

#### **Preliminary Report**

This report contains the results of a preliminary search for the target property. A final EDR Sanborn Map Report will be delivered after quality review is conducted. Only a final report should be used in connection with a final site assessment.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

✓ Library of Congress

✓ University Publications of America

✓ EDR Private Collection

#### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING. WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

#### **EXECUTIVE SUMMARY**

#### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1905 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

#### **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

#### WILLMER ENGINEERING INC. USER QUESTIONNAIRE – PHASE I ESA

User Name: Patrick Peters, Heath & Lineback – representative of proposed user, ABI

Facility/Project Name: Atlanta BeltLine Northeast Trail (GDOT PI No. 0009395)

Address: Armour Yards District
City, State, Zip: Atlanta, GA 30324

County: Fulton County, Georgia

Property Description:

BeltLine NE Trail in Armour Yards District, along Peachtree Creek, and

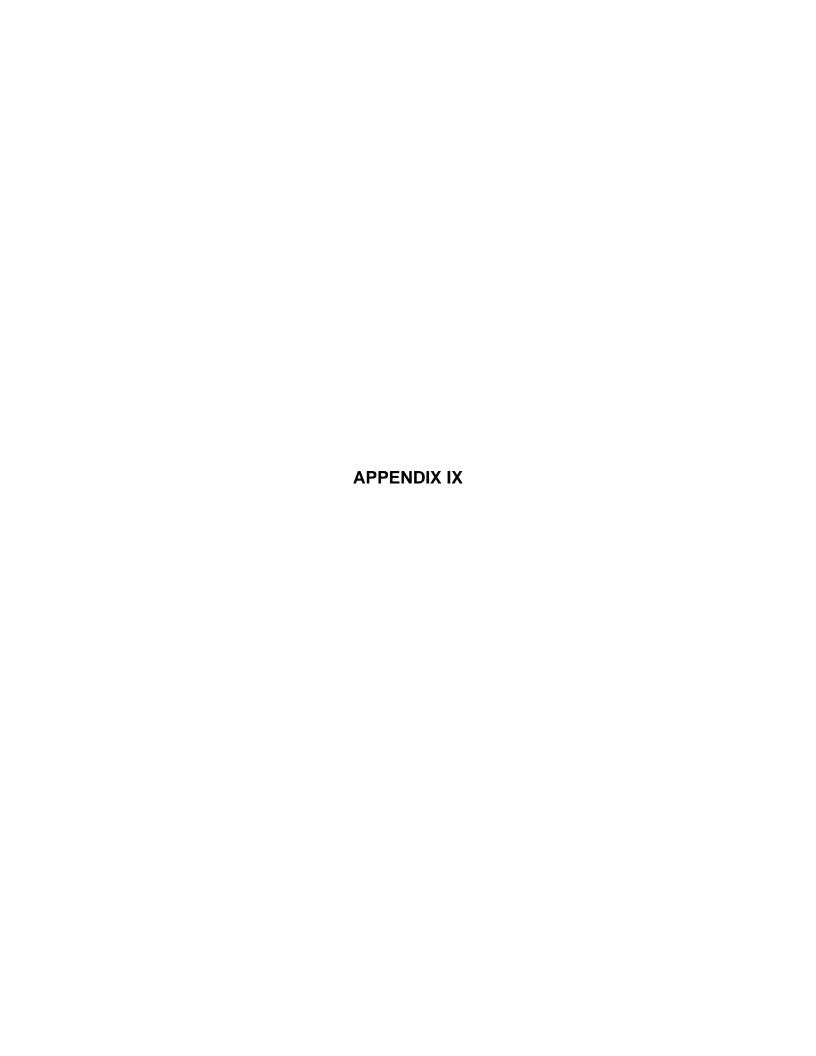

along Garson Drive

Date: 4/20/2022

#### **INTRODUCTION**

In order to qualify for one of the *Landowner Liability Protections (LLPs)*<sup>1</sup> offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*")<sup>2</sup>, the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

- Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Are you aware
  of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state
  or local law? No
- 2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? No
- 3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the user of the ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? No
- 4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? Yes, it will. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? N/A
- 5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonable ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,
  - a. Do you know the past uses of the *property?* No, just current uses.
  - b. Do you know of specific chemicals that are present or once were present at the *property?* No.
  - c. Do you know of spills or other chemical releases that have taken place at the property? No.
  - d. Do you know of any environmental cleanups that have taken place at the property? No.
- 6. The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the user of the *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*? None other than the knowledge of current usage (e.g. active railroad corridor and adjacent to a concrete plant).
- Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund liability in EPA's Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements" Guide) issued on March 6, 2003.
- P.L. 107-118.

#### **Corporate and Professional Qualifications**

Willmer is a woman-owned professional engineering consulting corporation based in Atlanta, Georgia. Incorporated in 1982, the focus of the firm is to provide high-quality, responsive, professional environmental, geotechnical and construction material testing and consulting services. We serve a wide variety of clients, including corporations, industries, financial institutions, developers, engineers, architects, and local, state, and federal governmental and educational institutions.

Based on our many years of experience, our personnel have worked on projects throughout the southeastern United States, as well as the Mid-Atlantic, Midwest and Gulf Coast regions. We are familiar with subsurface conditions and geology throughout these areas. Willmer seeks to establish long-lasting relationships with our clients. Our success is based on developing and maintaining trusted relationships and our ability to deliver quality engineering services. Most of our business comes from repeat clients and their referrals. The firm is organized to involve principals in active participation in projects and direct involvement with each client. Our personal reputations depend upon meeting our commitments. Through our many years of diversified consulting experience, we are able to direct a broad range of engineering expertise and talent toward satisfying complex client requirements.

Willmer environmental scientists and engineers have actively performed environmental assessments for real estate transactions since 1990. Our personnel have been trained in the elements of environmental assessments. Our work is performed in general accordance with the industry-accepted standard ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Assessment Process (E 1527-13). The Occupational Health and Safety Administration (OSHA) in 29 CFR 1910.120, Subpart H, requires that personnel performing environmental assessments be trained in employee protection requirements for workers engaged in hazardous waste operations. Willmer personnel have met these requirements by completing a 40-hour Hazardous Waste Training Course. Employees are also required to complete eight hours of health and safety training annually. We are knowledgeable in areas of regulatory compliance, including CERCLA and RCRA, as well as other federal, state, and local requirements.

The field work for this Phase I ESA and preparation of the report was performed by Keith Kaylor, PE, Project Engineer. Mr. Kaylor has over 29 years of environmental consulting experience, and has prepared over 500 Phase I and Phase II environmental investigations for a variety of diverse clients.

Dr. Moussa Issa, PE, performed senior review of this report. Dr. Issa has over 22 years of experience at the Georgia DOT, including conducting reviews of Phase I and Phase II site assessments.
