The Atlanta BeltLine is sparking a fun culture of health and activity in Atlanta. By providing parks, trails, transit and affordable in-town living, and by partnering with like-minded organizations, the Atlanta BeltLine is creating unique opportunities for healthier, more sustainable living in Atlanta.

We hope this movement will take hold and result in a lasting cultural shift towards better health.

Join us in creating a healthier Atlanta.

The objective of the Atlanta BeltLine’s Health Movement is to provide leadership, guidance, expertise and resources across two key initiatives:

- To identify and impact key health issues in Atlanta BeltLine communities while working to assess and remove barriers to healthy behaviors
- To brand the Atlanta BeltLine as a destination and resource for better health, fun activity and an active lifestyle

There are many ways you can get involved:

- **Join the Atlanta BeltLine Health Steering Committee**: key contacts from partner organizations that provide guidance and expertise to help further the Atlanta BeltLine’s health initiative.
- **Become a Program Partner**: non-profit and for-profit partners that provide programs to help achieve the Atlanta BeltLine’s health objectives.
- **Lend your Resources**: provide time and expertise to assist our efforts (e.g., technical expertise, communications support, funding, data analysis).
- **Get your Community Involved**: residents and communities along the Atlanta BeltLine that provide feedback and support communications and activation efforts.

Members of the Atlanta BeltLine Health Movement include:

- Center for Disease Control
